

A revolution in door and window frame systems

Enhance your next construction project with Rediframe™, the most versatile and contemporary door and window frame system available.

Designed to suit 90mm timber or steel stud framing, Rediframe is available to suit 10 or 13 mm plasterboard, and doors from 35-45mm. Frames come in standard sizes for time efficient installation or custom fabricated to suit your requirements.

All frames supplied completely pre-finished in natural anodised or any commercially available powdercoat finish. Rediframe comes in knock-down form, packaged with all necessary accessories.

Consider and enjoy these features:

- Compatible with timber & steel stud framing systems.
- Site adjustable
- Easy installation
- Sharp clean commercial appearance
- Incomparably fast and versatile
- Minimum lead times

Make an architectural statement with Rediframe™
